**The Problem:** Millions of emails must be appraised, processed, published for public access, and preserved by State Archives every year!

**The Solution:** Email management software from APPX that incorporates a blend of human interaction and Artificial Intelligence techniques. Installed on your server or hosted in the cloud.

- **Create searchable Archives for email accounts in the Repository**
  - Ingest emails from PST files, MBOX files, & eml files
  - Virus check, calc checksum, extract metadata, extract attachments, index
- **Create & Process Collections of email Accounts from the Repository**
  - Automatically and/or manually assign Record Classes
  - Automatically and/or manually assign Access Restrictions
  - Automatically and/or manually assign Retentions
  - Automatically and/or manually assign Labels
  - Automatically redact content
  - Create redacted access copies of attachments
- **Publish Processed Collections for public access**
  - Web search with facets & keywords or "Natural Language" prompt.
  - View redacted emails, emails in thread, and similar emails.
  - View access copies for attachments.

**COMING SOON!**

- **Export Collections for Preservation**
  - Export metadata in PREMIS and METS format
  - Export original eml files, redacted PDF & redacted attachments
